1. This action is in response to the amendment filed on 3/12/04.
2. Claims 1 and 24 have amended.
3. Claims 1-45 are allowed.

REASON FOR ALLOWANCE

4. The following is an examiner's statement of reason for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations, the method for recording profile information, the detecting and recording occurring under control of hardware of the computer without compiler assistance for execution profiling or event-by-event software intervention, as recited in the independent claims 1 and 24.

In the closest prior art, O'Donnell (US 6,374,360) discloses while executing a program on a computer, detecting the occurrence of profileable events; directing the instruction pipeline to record profile information describing the profileable events essentially concurrently with the occurrence of the profileable events. O'Donnell does not disclose detecting and recording occurring under control of hardware of the computer.

In the article "Using Branch Prediction Hardware to Support Profile-Driven Optimization", published on ACM, 1994, Conte discloses recording the profile in hardware without software intervention.

Neither O'Donnell nor Conte disclose detecting and recording occurring under control of hardware of the computer without compiler assistance for execution profiling or event-by-event software intervention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments of Statement of Reason for Allowance".

Conclusion

5. The prior art made or record and not relied upon is considered pertinent to applicant's disclosure.
